

S.T.A.R. Earthquake Rescue Lab

User Guide — Quick Reference

Open the App: https://escrow-taupe.vercel.app?_vercel_share=vad7H1etAkBMOIPBTADwcSfM1ThjMI4S

1. Getting Started

1. Open the link above in a desktop browser (Chrome, Edge, or Firefox recommended).
2. Enter your name in the sign-in field and click **Enter the Basement**.
3. You are placed inside a 3D earthquake-damaged basement. Your mission: investigate every station, answer survival questions, then rank 12 survival actions.

Returning? Your name is remembered automatically. Click **Re-enter the Basement** to continue.

2. Navigating the Scene

Action	How
Orbit / rotate camera	Click & drag with the mouse
Zoom in / out	Scroll wheel
Scan a station	Hover over a glowing marker — name appears at top of screen
Investigate a station	Click the glowing marker

3. Investigating Stations

There are **11 glowing markers** floating in the basement, one per station:

- | | |
|----------------------|--------------------------------|
| 1. Utility Panel | 7. Refrigerator / Food Station |
| 2. First-Aid Station | 8. Purification Supplies |
| 3. Radio Desk | 9. Overhead Pipes |
| 4. Water Station | 10. Blocked Stairwell |
| 5. Signal Board | 11. Candle Shelf |
| 6. Planning Table | |

When you click a marker: a popup opens with a survival question (3 choices). Select your answer, read the expert explanation, and the station is checked off on your **Mission Checklist** (left sidebar).

4. Mission Checklist & Rescue Readiness

- The **Mission Checklist** on the left tracks which stations you've visited.
- The **Rescue Readiness** bar (top-left, shown as a %) reflects your overall progress: **50%** from investigating stations, **35%** from correct answers, **15%** bonus for submitting your ranking.
- Goal: reach **100%** by investigating all stations, answering correctly, and submitting.

5. Ranking Board

1. Click **Ranking Board** in the top toolbar.
2. You'll see 12 survival action cards. Drag them (or use the arrow buttons) to rank from **1 (most helpful)** to **12 (most dangerous)**.
3. Use **Shuffle** to randomize the order if you want a fresh start.
4. When satisfied, click **Submit & Score**.

Scoring

For each action: **[Your Rank – Expert Rank]**. All 12 differences are summed. **Lower is better** — a perfect match scores 0.

Total Score	Rating
0 – 8	Elite Rescue Coordinator
9 – 20	Strong Survivor
21 – 34	Capable but Risky
35 – 48	In Danger
49+	Critical Mistakes

After Submission

- A **Rescue Readiness Report** shows your score, rating, and a side-by-side table (your rank vs. expert rank).
- Click **Download Report** to save a text summary. Click **Adjust Ranking** to revise and resubmit.

6. Expert Key

- The Expert Key is **locked** until you submit your ranking.
- Once unlocked, click **Expert Key** in the toolbar to see the official S.T.A.R. ranking (1–12) with expert reasoning.
- *Instructors*: enter the instructor passcode in the Expert Key panel to unlock it early.

7. Toolbar Reference

Button	What It Does
Ranking Board	Open / return to the ranking interface
Expert Key	View official expert ranking (unlocked after submission)
Help	Open mission briefing, controls, and scoring rules
Sound	Toggle ambient audio and UI sounds on/off
Enable Alerts	Turn on browser notifications for drill reminders
Reset	Clear all progress and start over

8. Tips for Success

1. **Investigate all 11 stations first** before opening the Ranking Board — the clues help you rank accurately.
2. **Read the expert feedback** after each question; it explains why an action is ranked where it is.
3. After submitting, study the **difference column** in your report to see where you diverged from experts.
4. Use **Adjust Ranking** to try again — you can resubmit as many times as you like.

Alerts: Click **Enable Alerts** to receive drill reminders even after you close the tab. Your browser will ask for notification permission.
